- 6.1.1 The Parties hereby expressly acknowledge and agree that in the event of GOI declaring an emergency (as communicated by GOI, through AAI or otherwise, at its sole discretion), AAI shall, upon giving at least seven (7) days written notice to the JVC or upon such shorter notice as may be reasonable taking into account the nature of emergency, have the right, in its sole discretion, to (i) temporarily assume control of the Airport (whether in whole or in part) and to operate and manage the same in accordance with the terms and conditions set out under the OMDA, instead of the JVC during the course and effect of such emergency; or (ii) require the JVC to manage the Airport (whether in whole or in part) in accordance with the directions of the GOI/ AAI during the course and effect of such emergency.
- 6.1.2 The Parties further acknowledge and agree that within seven (7) days of cessation of an emergency or any effect thereof, or such longer time-period as may be reasonable taking into account the nature of emergency, GOI shall use its best efforts to ensure that the Airport (as it stands on that date) is handed back to the JVC to operate and manage the same in accordance with the terms and conditions of the OMDA.

**CLAUSE 7
TERM AND TERMINATION**

- 7.1 Subject to Clause 2 above, this Agreement shall come into full force and effect from the Effective Date and shall, unless terminated earlier, continue in full force and effect for the entire term of the OMDA (“**Term**”) and shall be co-terminus with the OMDA. For abundant caution, it is hereby expressly clarified that this Agreement shall terminate automatically with the expiry or early termination of the OMDA.

**CLAUSE 8
FORCE MAJEURE**

- 8.1 Either Party shall be entitled to suspend or excuse performance of its respective obligations under this Agreement to the extent that it is/ they are unable to render such performance due to an event of Force Majeure..

- 8.2 Where a Party is claiming suspension of its obligations on account of Force Majeure, it shall promptly, but in no case later than seven (7) days after the occurrence of the event of Force Majeure, notify the other Party in writing giving full particulars of the Force Majeure, the estimated duration thereof, the obligations affected and the reasons for its suspension.
- 8.3 A Party claiming Force Majeure shall exercise reasonable diligence to seek to overcome the Force Majeure event and to mitigate the effects thereof on the performance of its obligations under this Agreement provided, however, that the settlement of strikes or differences with employees shall be within the discretion of the Party having the difficulty. The Party affected shall promptly notify the other Parties as soon as the Force Majeure event has been removed and no longer prevents it from complying with the obligations, which have been suspended and shall thereafter resume compliance with such obligations as soon as possible.
- 8.4 Where a Party is prevented from exercising any rights or performing any obligations under this Agreement due to an event of Force Majeure, the time for the performance of the obligations affected thereby or the exercise of any right dependent thereon, shall be extended by such additional period as corresponding to the period of pendency of the event of Force Majeure preventing and/or delaying performance, or such other period as may be agreed between the Parties.
- 8.5 Notwithstanding anything contained hereinabove, if an event of Force Majeure occurs and continues for a period of 365 days, the Parties shall meet to discuss the consequences of such event of Force Majeure and the course of action to be taken to mitigate the effects thereof or to be adopted in the circumstances.

CLAUSE 10 CHANGE IN LAW

- 10.1 The JVC hereby undertakes and confirms that it shall, in accordance with Applicable Law, take best efforts to mitigate the adverse effect of a Change in Law, including obtaining and maintaining, throughout the Term, such insurances (in addition to those set out under the OMDA) for and/or in relation to the Airport, as may be considered prudent in accordance with Good Industry Practice.
- 10.2 If as a result of Change in Law, the JVC suffers an increase in costs or reduction in net after tax return or other financial burden, loss, liability or damage in connection with its development or operation of Aeronautical Services and Aeronautical Assets at the Airport, the aggregate financial effect of which exceeds Rupees ten crores (Rs 10,00,00,000) in any financial year, the JVC may notify GOI and propose amendments to the OMDA so as to put the JVC in the same financial position as it would have occupied had there been no such Change in Law resulting in such cost increase, reduction in return or other financial burden, loss, liability or damage as aforesaid (the “**Amendment Notice**”).

- 10.3 GOI, upon receiving the Amendment Notice by the JVC, shall undertake all reasonable efforts to ensure that AAI agrees to the aforesaid amendments proposed by the JVC to the OMDA and/or this Agreement.
- 10.4 If GOI, despite using its reasonable efforts, is unable to cause AAI to make the necessary amendments to the OMDA within ninety (90) days of receiving the OMDA Amendment Notice, or in the event it is not possible to make suitable amendments to the OMDA, the JVC may by notice in writing require GOI to pay an amount that would put the JVC in the same financial position it would have occupied had there been no such Change in Law resulting in such cost increase, reduction in return or other financial burden, loss, liability or damage as aforesaid (“**Compensation Notice**”). The Compensation Notice shall be accompanied by such supporting documents and evidences in order to assist GOI to evaluate such claim. In this regard, the JVC further undertakes to provide any and all such assistance as GOI may require in order to evaluate the compensation claim.

- 10.8 If as a result of Change in Law, the JVC incurs a reduction in costs or increase in net after tax return or other financial gain or benefit in connection with its development or operation of Aeronautical Services and Aeronautical Assets at the Airport, the aggregate financial effect of which exceeds Rupees ten crores (Rs. 10,00,00,000/-) in any financial year, the JVC shall notify GOI and pay to GOI an amount that would put the JVC in the same financial position it would have occupied had there been no such Change in Law resulting in such cost reduction, increase in return or other financial gain or benefit as aforesaid.

- 10.9 The JVC shall make payment of such compensation within sixty (60) days of the said financial benefit. Provided however that the GOI may by notice in writing require the JVC to pay an amount that would put the JVC in the same financial position it would have occupied had there been no such Change in Law resulting in such cost reduction, increase in return or other gain or benefit. If the JVC shall dispute the quantum of such compensation claim of **GOI**, the same shall be finally settled in accordance with the dispute resolution mechanism contained herein.

**CLAUSE 11

SCHEDULE 1

PRINCIPLES OF TARIFF FIXATION

Background

If despite all reasonable efforts of the GOI, AERA is not in place by the time required to commence the first regulatory review, the Ministry of Civil Aviation will continue to undertake the role of approving aero tariff, user charges, etc.

Principles

In undertaking its role, AERA will (subject to Applicable Law) observe the following principles:

1. Incentives Based: The JVC will be provided with appropriate incentives to operate in an efficient manner, optimising operating cost, maximising revenue and undertaking investment in an efficient, effective and timely manner and to this end will utilise a price cap methodology as per this Agreement.
2. Commercial: In setting the price cap, AERA will have regard to the need for the JVC to generate sufficient revenue to cover efficient operating costs, obtain the return of capital over its economic life and achieve a reasonable return on investment commensurate with the risk involved.
3. Transparency: The approach to economic regulation will be fully documented and available to all stakeholders, with the Airports and key stakeholders able to make submissions to AERA and with all decisions fully documented and explained.
4. Consistency: Pricing decisions in each regulatory review period will be undertaken according to a consistent approach in terms of underlying principles.
5. Economic Efficiency: Price regulation should only occur in areas where monopoly power is exercised and not where a competitive or contestable market operates and so should apply only to Aeronautical Services. Further in respect to regulation of Aeronautical Services the approach to pricing regulation should encourage economic efficiency and only allow efficient costs to be recovered through pricing, subject to acceptance of imposed constraints such as the arrangements in the first three years for operations support from AAI.
6. Independence: The AERA will operate in an independent and autonomous manner subject to policy directives of the GOI on areas identified by GOI.
7. Service Quality: In undertaking its role AERA will monitor, pre-set performance in respect to service quality performance as defined in the Operations Management Development Agreement (OMDA) and revised from time to time.
8. Master Plan and Major Development Plans: AERA will accept the Master Plan and Major Development Plans as reviewed and commented by the GOI and will not seek to question or

change the approach to development if it is consistent with these plans. However, the AERA would have the right to assess the efficiency with which capital expenditure is undertaken.

9. Consultation: The Joint Venture Company will be required to consult and have reasonable regard to the views of relevant major airport users with respect to planned major airport development.
10. Pricing responsibility: Within the overall price cap the JVC will be able to impose charges subject to those charges being consistent with these pricing principles and IATA pricing principles as revised from time to time including the following:
 - (i) Cost reflectivity: Any charges made by the JVC must be allocated across users in a manner that is fully cost reflective and relates to facilities and services that are used by Airport users;
 - (ii) Non discriminatory: Charges imposed by the JVC are to be non discriminatory as within the the same class of users.;
 - (iii) Safety: Charges should not be imposed in a way as to discourage the use of facilities and services necessary for safety;
 - (iv) Usage: In general, aircraft operators, passengers and other users should not be charged for facilities and services they do not use.

Calculating the aeronautical charges in the shared till inflation – X price cap model

The revenue target is defined as follows

$$TR_i = RB_i \times WACC_i + OM_i + D_i + T_i - S_i$$

Where TR = target revenue
RB = regulatory base pertaining to Aeronautical Assets and any investments made for the performance of Reserved Activities etc. which are owned by the JVC, after incorporating efficient capital expenditure but does not include capital work in progress to the extent not capitalised in fixed assets. It is further clarified that working capital shall not be included as part of regulatory base. It is further clarified that penalties and Liquidated Damages, if any, levied as per the provisions of the OMDA would not be allowed for capitalisation in the regulatory base. It is further clarified that the Upfront Fee and any pre-operative expenses incurred by the Successful Bidder towards bid preparation will not be allowed to be capitalised in the regulatory base.

WACC = nominal post-tax weighted average cost of capital, calculated using the marginal rate of corporate tax

OM = efficient operation and maintenance cost pertaining to Aeronautical Services. . It is clarified that penalties and Liquidated Damages, if any, levied as per the provisions of the OMDA would not be allowed as part of operation and maintenance cost.

D = depreciation calculated in the manner as prescribed in Schedule XIV of the

Indian Companies Act, 1956. In the event, the depreciation rates for certain assets are not available in the aforesaid Act, then the depreciation rates as provided in the Income Tax Act for such asset as converted to straight line method from the written down value method will be considered. In the event, such rates are not available in either of the Acts then depreciation rates as per generally accepted Indian accounting standards may be considered.

\underline{T} = corporate taxes on earnings pertaining to Aeronautical Services

\underline{S} = 30% of the gross revenue generated by the JVC from the Revenue Share Assets. The costs in relation to such revenue shall not be included while calculating Aeronautical Charges.

“**Revenue Share Assets**” shall mean (a) Non-Aeronautical Assets; and (b) assets required for provision of aeronautical related services arising at the Airport and not considered in revenues from Non-Aeronautical Assets (e.g. Public admission fee etc.)

\underline{i} = time period (year) i

$$RB_i = RB_{i-1} - D_i + I_i$$

Where:

\underline{RB}_0 for the first regulatory period would be the sum total of

(i) the Book Value of the Aeronautical Assets in the books of the JVC and

(ii) the hypothetical regulatory base computed using the then prevailing tariff and the revenues, operation and maintenance cost, corporate tax pertaining to Aeronautical Services at the Airport, during the financial year preceding the date of such computation.

\underline{I} = investment undertaken in the period

The X factor is calculated by determining the X factor that equates the present value over the regulatory period of the target revenue with the present value that results from applying the forecast traffic volume with a price path based on the initial average aeronautical charge, increased by CPI minus X for each year. That is, the following equation is solved for X:

$$\sum_{i=1}^n \frac{RB_i \times WACC_i + OM_i + D_i + T_i - S_i}{(1 + WACC_i)^i} = \sum_{i=1}^n \sum_{j=1}^m \frac{AC_{i,j} \times T_{i,j}}{(1 + WACC_i)^i}$$

where

$AC_{i,j}$ = average aeronautical charge for the j^{th} category of aeronautical revenue in the i^{th} year

$T_{i,j}$ = volume of the j^{th} category of aeronautical traffic in the i^{th} year

X = escalation factor

n = number of years considered in the regulatory period

m = number of categories of aeronautical revenue e.g. landing charges, parking charges, housing charges, Facilitation Component etc.

The maximum average aeronautical charge (price cap) in a particular year ‘i’ for a particular category of aeronautical revenue ‘j’, is then calculated according to the following formula:

$$AC_i = AC_{i-1} \times (1 + CPI - X)$$

where CPI = average annual inflation rate as measured by change in the All India Consumer Price Index (Industrial Workers) over the regulatory period

The following is an illustrative numeric example of a price cap model showing how the X factor is determined. The example relates to a five-year regulatory period where the X is calculated as an average factor for each of the five years.

Illustrative Numerical Example of the Price Cap Approach

The following is an indicative numerical example illustrating the methodology to calculate aeronautical charges. This is just an example and may not be followed by AERA or the GOI, as the case may be.

Assumptions

AirportCo is an airport company with the following parameters:

Existing regulated asset base = \$500m

Net working capital for aeronautical services = nil

Existing aeronautical revenue = \$67m

Aeronautical related revenue shared in regulated till = 30%

Existing traffic volume = 48 million passengers, aeronautical charges levied on a per passenger basis only

Post-tax nominal WACC = 7.0%

Pre-tax cost of debt = 4.0%

Debt – equity ratio for financing regulatory base = 2:1

CPI based inflation = 3.0%

Book life of existing regulated assets = 32.5 years

Book life of new regulated capital expenditure = 35 years

Rate of corporate tax = 10%, assumed to be the rate of corporate tax applicable to the earnings from Aeronautical Services as computed according to the Indian Income Tax Act

Assumption (all figures in current prices)	2003	2004	2005	2006	2007	2008
