5. Air India Ltd.

(I) OTP - Air India has achieved OTP of 79.2% during the period April to September, 2016 vis-à-vis 79.4% last year. This is against the targeted OTP of 90%. It may be clarified that Air India is a network carrier and not a point to point carrier like the domestic airlines in India and as a result of which the OTP is affected due to delay in the Hub & Spoke flights. Air India is a member of Star Alliance which has 27 airlines under its membership. Air India ranks 7th in terms of its OTP performance in respect of other Star Alliance carriers. OTP is monitored at the higher level by the top management of Air India as well as MoCA. The OTP of the domestic sector for the period April to September, 2016 was 82.4% vis-à-vis 80.5% in the corresponding period last year.

(II) Passenger Load Factor - For the period April to September 2016, the passenger load factor on the network was 76.1% (74.9%), domestic 81.4% (78.7%) and international 74.2% (73.6%), figures in brackets represent corresponding achievement last year for the same period.

It would, therefore, be observed that Air India has been able to achieve a significant improvement in the operating performance since the commencement of the TAP.

(III) Aircraft utilization - Likewise, aircraft utilization also improved and presently the Narrow Body fleet is used for 11.75 hours and Wide Body fleet for 15.10 hours in respect of 787 and 13 to 14 hours in the case of 777.

(IV) Financial Performance Air India also improved its financial performance and achieved an operating profit of Rs.105 crores in the year 2015-16. The capacity in terms of ASKms improved by 4.81% as compared to last year, without addition of any aircraft. The number of passengers carried has also increased from 16.88 Million to 18 Million in 2015-16. The net loss reduced from Rs.5859.91 crores in 2014-15 to Rs.3836.78 crores in 2015-16. Earnings before interest, tax, depreciation and amortization increased from Rs.337.77 crores to Rs 2413.29 crores.
